Portfolio: https://ghaith-portfolio.com

Objective

Seeking challenging opportunities in full stack development to leverage my skills in programming, software design, and database management, contributing to innovative projects and growing as a professional developer.

Languages

Arabic: Native

English: Advanced

Experience

Programming Fundamentals – 3 years

Gained strong knowledge of programming logic, algorithms, and data structures. Proficient in Python, C++, and Java. Experienced in problem-solving and debugging across different environments.

Software and Web Design – 3 years

Developed software interfaces and responsive websites using HTML, CSS, JavaScript, and UI/UX principles. Familiar with databases and frameworks like React and Django.

Microsoft Office Applications – 5+ years

Skilled in Word, Excel, PowerPoint, and Access. Able to automate reports and manage structured data efficiently.

Graphic Design – 5+ years

Created visual content using Photoshop, Illustrator, and Canva. Designed posters, social media content, and branding materials.

Teamwork and Collaboration – 4 years

Worked effectively in group projects and academic teams. Experienced with Agile methodologies and version control (Git).

Database Management – 2 years

Designed and managed relational databases using MySQL and PostgreSQL. Wrote optimized SQL queries and maintained data integrity.
